International Journal of Fracture

CONTENTS OF VOLUME 57 (1992)

Vol. 57, No. 1, 1 September 1992

The initiation and growth of delaminations induced by matrix microcracks in laminated composites	J.A. NAIRN and S. HU	1
Fracture initiation at a crack or notch in a viscoplastic material under high rate loading	Y.J. LEE	25
Singularities at the apex of a sharp V-notch in a linear strain-hardening material	Y.J. CHAO and S. YANG	47
Crack tip stress intensities in viscoelastic anisotropic bimaterials and the use of the *M*-integral	C. ATKINSON and D.A. EFTAXIOPOULOS	61
Fracture mechanics – *theoria* or *tekhne?*	K.B. BROBERG	85

Vol. 57, No. 2, 15 September 1992

Stress intensity factors in two bonded elastic layers with a single edge crack under various loading conditions	N.-A. NODA, K. ARAKI and F. ERDOGAN	101
Double virtual crack extension method for crack growth stability assessment	X.-Z. SUO and A. COMBESCURE	127
Effect of transverse shear flexibility on the transient response of cracked laminated composite plates to sudden bending	L. LIBRESCU and D. SHALEV	151
Fracture mechanics description of fracture mirror formation in single crystals	Y.L. TSAI and J.J. MECHOLSKY, Jr.	167
Dynamic mode II stress intensity factors of an infinite cracked medium subjected to transient concentrated forces	B.-X. CHEN and X.-Z. ZHANG	183

Vol. 57, No. 3, 1 October 1992

Monitoring of a surface crack in a finite body by means of electrical potential technique	N. TADA	199
Tensile fracture from circular cavities loaded in compression	B.J. CARTER, E.Z. LAJTAI and Y. YUAN	221
Stress intensity factors for penny- and half-penny-shaped cracks subjected to a stress gradient	R.J. HAND	237
Elastic–plastic crack analysis under mixed mode loading conditions	P. DIEKMANN, P. PAWLISKA and H.A. RICHARD	249
A model of fatigue crack growth based on Dugdale model and damage accumulation	S.-X. WU, Y.-W. MAI and B. COTTERELL	253
An integral formulation of C_t for use in creep crack growth evaluation	A.-Y. KUO, K.-L. CHEN, A. SAXENA and A. NAGAR	269
A new thermodynamic model for a process zone in polymers	A. STOJIMIROVIC and A. CHUDNOVSKY	281

Vol. 57, No. 4, 15 October 1992

A finite element investigation of quasi-static and dynamic asymptotic crack-tip fields in hardening elastic–plastic solids under plane stress. Part I: Crack growth in linear hardening materials	X. DENG and A.J. ROSAKIS	291
The value of the J-integral at the onset of crack extension from a weld defect: weld material is harder than parent material	E. SMITH	309
Mechanical equilibrium of an edge dislocation dipole near a crack tip	S.-D. WANG and S. LEE	317
Singular fields of a mode III interface crack in a power law hardening bimaterial	S.-W. YU and Z.-G. ZHOU	325
Prediction of arbitrary crack growth from the interface between two dissimilar elastic materials	I.V. SIMONOV	349
Crack growth on elastic–plastic bimaterial interfaces	X.F. LUO and S. AOKI	365
Thermal stress intensity factors of interface cracks in bimaterials	M. MEYER and S. SCHMAUDER	381
